<p>iPhone 4G 32GB Unlocked Version 4.x (This is Unlocked and very limited quantity)</p> <p>This is the most Up To Date version of iPhone 4G Unlock.</p> <ul style="list-style-type: none"> <li>* You can use the iPhone with any Sim Cards in the USA Guaranteed to work with ALL GSM Carriers such as T-mobile, Cingular, AT&amp;T, Rogers and International GSM Carriers.</li> <li>* Works with any Sim Cards in Overseas</li> <li>* Available colors to choose: Black or White</li> <li>* No Contract! No Activation!</li> <li>* comes with Full Apple Warranty</li> </ul> <p>Additional Information</p> <p>iPhone 4 32GB UNLOCKED 4.0 iOS Quad Band GPS Wi-Fi Limited Stock</p> <p>While everyone else was busy trying to keep up with iPhone, we were busy creating amazing new features that make iPhone more powerful, easier to use, and more indispensable than ever. The result is iPhone 4. The biggest thing to happen to iPhone since iPhone.</p> <p>Facetime</p> <p>People have been dreaming about video calling for decades. iPhone 4 makes it a reality. With just a tap, you can wave hello to your kids, share a smile from across the globe, or watch your best friend laugh at your stories — iPhone 4 to iPhone 4 over Wi-Fi. And it works right out of the box. No other phone makes staying in touch this much fun.</p> <p>Two cameras, two views.</p> <p>iPhone 4 has two cameras: One on the front, which focuses on you. And one on the back, which focuses on everything else. FaceTime lets you switch back and forth between them at any time during a video call. All you have to do is tap a button.</p> <p>Retina Display</p> <p>The Retina display on iPhone 4 is the sharpest, most vibrant, highest-resolution phone screen ever, with four times the pixel count of previous iPhone models. In fact, the pixel density is so high that the human eye is unable to distinguish individual pixels. Which makes text amazingly crisp and images stunningly sharp.</p> <p>Multitasking</p> <p>iPhone 4 introduces a whole new way of multitasking. Now you can run your favorite third-party apps — and switch between them instantly — without slowing down the performance of the foreground app or draining the battery unnecessarily.<sup>1</sup> This smarter approach to multitasking is available only on iPhone.</p> <p>HD Video Recording and Editing</p>

iPhone 4 introduces a whole new way of multitasking. Now you can run your favorite third-party apps — and switch between them instantly — without slowing down the performance of the foreground app or draining the battery unnecessarily.<sup>1</sup> This smarter approach to multitasking is available only on iPhone.

#### 5-Megapixel Camera with LED Flash

Take beautiful, detailed photos with the new 5-megapixel camera with built-in LED flash. The advanced backside illumination sensor captures great pictures even in low light. And the new front-facing camera makes it easy to take self-portraits.
